FEATURES

BUSI® IDEA TERRY is a high production single cylinder sock machine with latch needles in the dial to enable it to produce true rib socks for men and children and it is provided with full electronic control.

The terry device enables the **fully automatic switching from plain stitch to half terry and to full terry.**

It is also optionally available a terry device that enables the machine knitting the sandwich terry and the normal terry without any mechanical change. The machine is available with one or two feeds. The features of the two versions are listed in the table below.
